

One day Grace saw a glowing tadpole in the pond by her house.

As soon as she tried to touch it, she got tingled.

It was as if she "activated" it. He grew fourteen times his size in two seconds!

She was so excited, she tried to chase the frog to get a closer look at him as he hopped away.

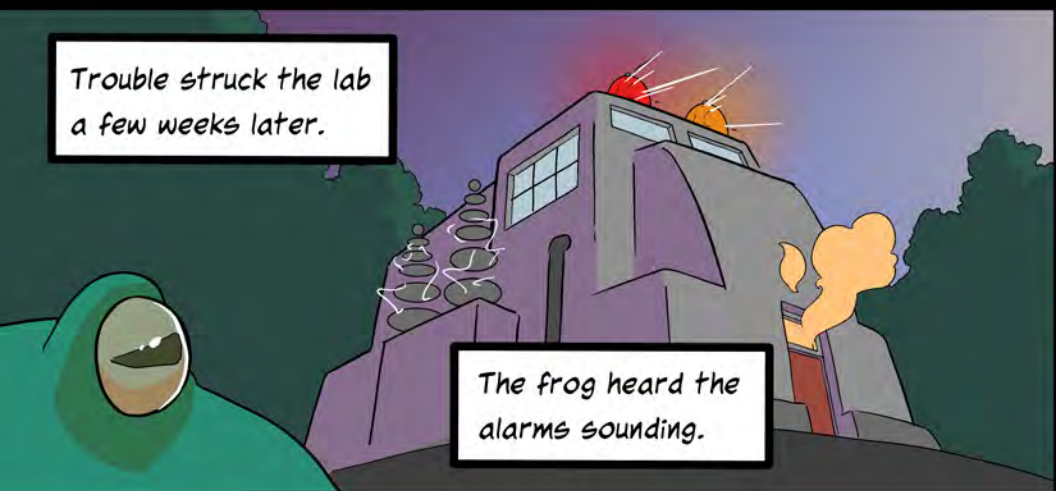

Throughout the night...

...in the woods next to her house...

...the frog had grown wings.

Trouble struck the lab a few weeks later.

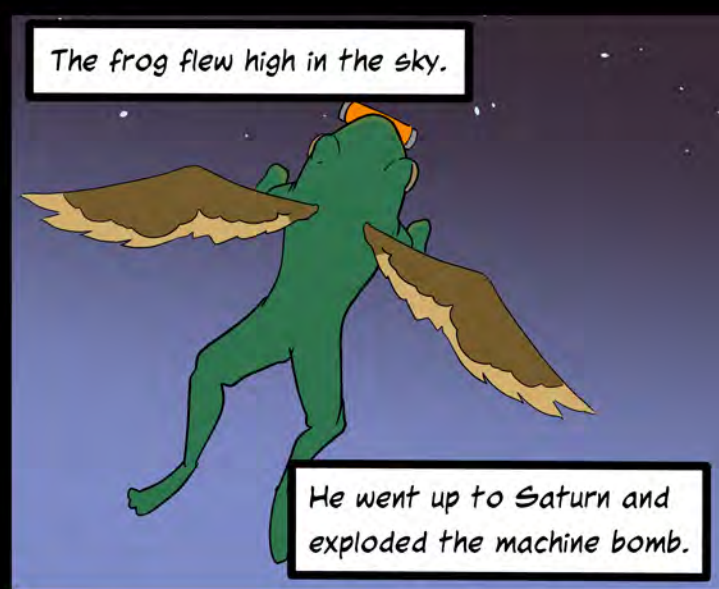

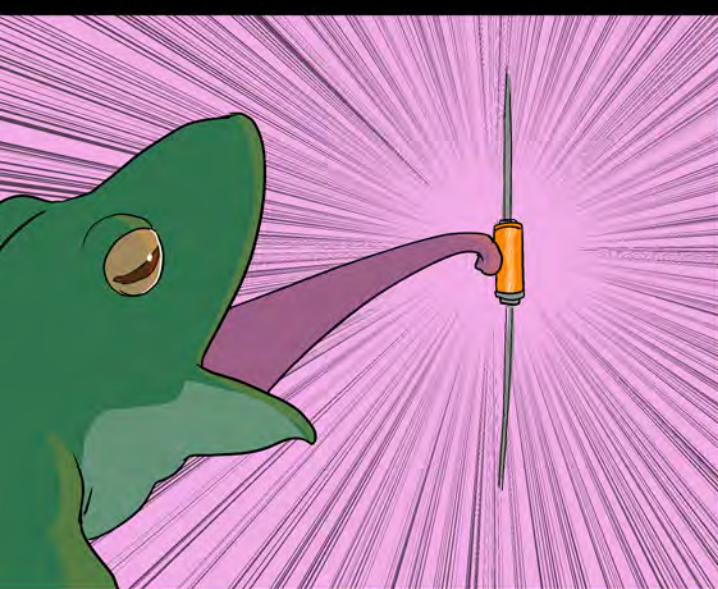

The frog heard the alarms sounding.

The slime had become unstable and too toxic.

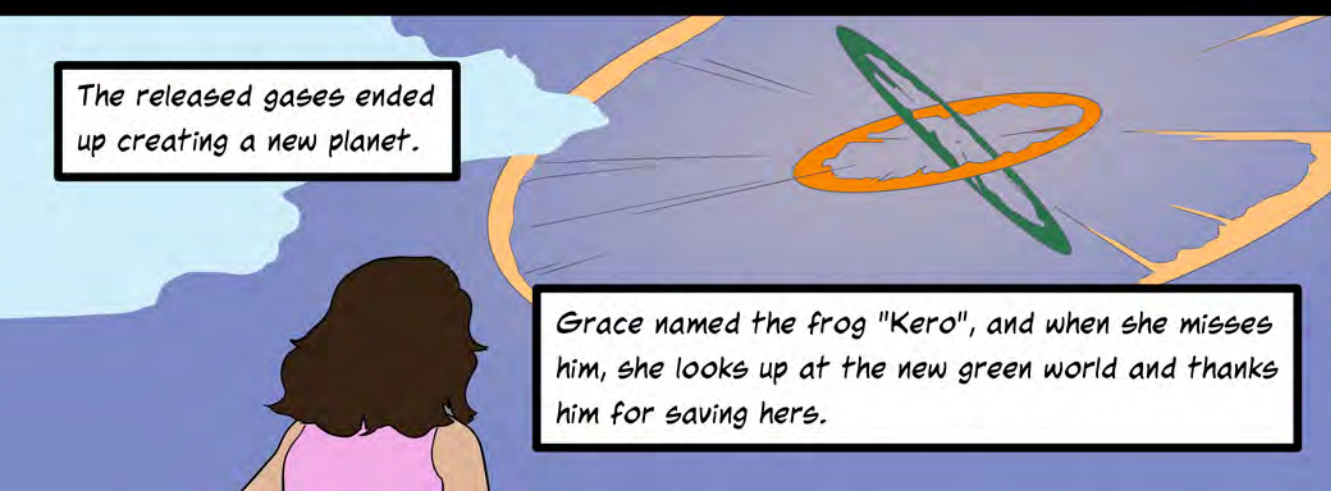

CRASH

The frog flew high in the sky.

He went up to Saturn and exploded the machine bomb.

The released gases ended up creating a new planet.

Grace named the frog "Kero", and when she misses him, she looks up at the new green world and thanks him for saving hers.

# KERO

The Frog
